harvest is our
OBLIGATION**

THE DOOR TO DOOR WASTE COLLECTION

Dear Citizens,

With these words we would like to begin a new phase of a project that affects our reality as a community, a phase that will make us realize the importance of recycling and waste collection.

Waste, something that has always been seen as a problem that needed to be solved, a subject of little importance, the last and least of a municipality's problems.

Today a change of direction is a necessity and an obligation, a change towards a new way of considering waste – no longer as a problem but rather as a resource. Waste is the raw material that can have a second life if separated and recycled correctly. Plastic, glass, metals, paper that we must not throw away, materials that must not be incinerated. The more we separate, the less we waste, and the more we save.

**WASTE MUST BE SELECTED AND FILED
IN FRONT OF THE DOOR OF YOUR OWN HOME
FROM 10.00 PM TO 06.00 A.M.**

IMPORTANT ADVICE:

Municipal administrator warns the citizenry that will strengthen its controls and monitoring of the collection, so that following the procedures and timetable described in this leaflet. Therefore, the City will make use of the video surveillance system and controls carried out by the Municipal Police Force to prevent the abandonment of waste on the territory. Violators will be punished with the penalties provided by law.

**We encourage citizens to follow the times and to
RESPECT THE CALENDAR**
